April 6, 2004

TO: Minerals File

FROM: Lynn Kunzler, Senior Reclamation Biologist *LK*

SUBJECT: Site Inspection, Lanny Jensen, Cream Time Quarry, S/039/009, Sanpete County, Utah

Date of Inspection: March 31, 2004  
Time of Inspection: 10:00 a.m.  
Conditions: Fair, breezy  
Participants: Danny Bown, Adjacent Operator; Lynn Kunzler, DOGM

**Purpose of Inspection:** To document site conditions and discuss final reclamation.

#### Observations:

Mr. Gerald Willden, landowner, was invited to attend this inspection. However, he was unable to be there. Danny Bown, the adjacent operator of the Mayfield Quarry (S/039/011) attended this inspection of the Cream Time Quarry, because he has agreed to complete the regrading work on this site for the Jensen's.

Much of the quarry has been regraded, with approximately two acres remaining. Regrading would consist of reducing the slopes on the remaining overburden dumps, filling in the small pit area, and assuring that the landowner has access to trail his cattle along the fence on the western edge of this operation. The area would then be seeded as per landowner desires.

Mr. Bown indicated that he would be willing to complete the regrading and that it will only take a day or two to accomplish this. He may also use some of his excess overburden to blend the final surface contours between the two operations to benefit the surface owner (Mr. Willden owns the surface on both projects). Mr. Bown indicated that he would give me a call when the regrading was completed so that I could come and inspect it. I briefly discussed the Division's Earthday Award and indicated that I would nominate this project for an award next year, since Mr. Bown was doing reclamation work for an adjacent operator, which is not part of his own permitted area.

Several photos were taken to document site conditions.
